WCHFH RECEIVES \$10,000 GRANT

Washington, NJ—9/24/19—Atlantic Health System (AHS) and Hackettstown Medical Center (HMC) are committed to building healthier communities, beyond simply the delivery of excellent health care in our hospitals, medical practices and facilities. Understanding and supporting the needs of our local community in Morris and Warren counties is a top priority for HMC.

With that in mind, the Community Advisory Board (CAB) of Hackettstown Medical Center was recently pleased to award Warren County Habitat for Humanity with an HMC CAB grant for programming at the Warren County Community Center.

A list of priority health needs in Warren County were identified in the most recent Community Needs Assessment performed by the North Jersey Health Collaborative, in partnership with Hackettstown Medical Center and Atlantic Health System.

This grant awarded to Warren County Habitat for Humanity has met one or more of the identified priority health needs, and will now help Hackettstown Medical Center and Atlantic Health System address these needs - this is great news for residents of this region!
